

Never has there been a more crucial time for you to demonstrate that your business is serious about Health and Safety. This commitment is not only vital in safeguarding your workforce and the general public but is increasingly a key factor in securing customers and obtaining affordable insurances.

The Vision Health Check has arrived!

The Vision Health Check is a health and safety risk management audit of your business. The Health Check involves the assessment of your arrangements for health and safety risk management through a process of interview, document checks and observation.

Vision Employment and Health and Safety has developed a set of health and safety control standards for all the health and safety topics contained in this audit report. The control standards are based on legislative requirements and enable our health and safety consultants to review the key risk controls that you currently have in place against the requirements specified in legislation. Your level of compliance will be scored against these control standards.

Why does my business need a Vision Health Check?

Most insurers are reluctant to insure businesses that do not pass their new stringent acceptance requirements and top of their list is adherence to good risk management practices. Leading Insurers have publicly stated what most brokers already know and that message is clear; 'if you want affordable insurance, show us evidence of your commitment to Health and Safety'. This message is increasingly being echoed by your customers, who view businesses that place Health and Safety high on their priority list as acceptable business partners.

If the worst happens and a serious accident occurs, you will be able to demonstrate that your firm has not been complacent on Health and Safety matters and this should also assist your defence should a criminal prosecution be brought.

In addition to preparing an easy to understand Health Check, our consultants will:

- Produce an action plan to solve urgent and other problems.
- Produce an outline liability risk presentation for your insurance broker to assist in presenting your risks to potential insurers. This feature alone can save far more premium than the cost of the Health Check.
- Discuss fully supported and other self managed health and safety programmes.

Unlike some providers, Vision only uses qualified Health and Safety specialists. Vision also supports some products and services with an option to include specialist insurance protection. Contact your solicitor for further information.
